

# Chlamydia Screening in Women (CHL)

## HEDIS® Measurement Year 2024

**Measure description:** The percentage of women 16–24 years of age (as of December 31 of the measurement year) who were identified as sexually active and who had at least one test for chlamydia during the measurement year.

**Note:** Members are identified as being sexually active by pharmacy data and claim/encounter data.

### Numerator codes

There is a large list of approved NCQA codes used to identify the services included in the CHL measure. The following are just a few of the approved codes.

**For a complete list, refer to the NCQA website at [www.ncqa.org](http://www.ncqa.org).**

Chlamydia Tests	
CPT	87110, 87270, 87320, 87490, 87491, 87492, 87810

### Strategies for improvement

- Incorporate a sexual history into the History and Physical.
- Screen all sexually active women for chlamydia through age 25.
- Educate members about sexually transmitted diseases, include signs, symptoms, and treatment.
- Educate members about safe sex and abstinence.
- Document all screenings in the medical record, including follow-ups, results, and abnormal findings.
